

Publishers Converting Their Book Catalogues into Audiobooks

Major Publishers and Their Audiobook Initiatives

Publisher	Country/Region	Audiobook Activity (Evidence)	Platforms	Production Approach / Notes
Penguin Random House (PRH)	USA (Global)	Operates PRH Audio , which now produces about <i>2,000 audiobooks per year</i> , up from 500 in 2008 ¹ . PRH's goal is to record virtually every suitable PRH title ² , with dedicated audio studios in New York, LA, and international locations.	Audible, Apple Books, Spotify (limited), OverDrive (libraries), etc.	In-house audio division (PRH Audio) with a <i>worldwide network of studios and talent</i> . PRH Audio has expanded globally (e.g. Spanish-language production in multiple countries) ³ and even runs its own casting platform (Ahab) for narrators ⁴ .
HarperCollins Publishers	USA / UK (Global)	Runs HarperAudio imprints. Recently partnered with ElevenLabs (AI) to generate audiobooks for select backlist series in multiple languages – creating audio versions of books that otherwise “ <i>would not have been created</i> ” in audio ⁵ . Continues to produce frontlist titles with human narrators as well.	Audible, Apple Books, Spotify, libraries, etc. (plus Audible.in for some non-English).	Mix of in-house and partnerships. HarperCollins UK is <i>experimenting with AI narration for backlist expansion</i> ⁵ (while still investing in actor-narrated audio for new titles). Globally, HarperCollins has long-established audio production (HarperAudio) for its titles and distributes widely.

Publisher	Country/ Region	Audiobook Activity (Evidence)	Platforms	Production Approach / Notes
Hachette Livre / Hachette Book Group	France / USA / UK (Global)	Has Hachette Audio division. Audio sales are booming: <i>Hachette Audio was a “standout” in Q1 2023</i> with rising sales across frontlist and backlist titles ⁶ . Hachette produces hundreds of audiobooks annually (e.g. 700+ in 2017) ⁷ and has won multiple Audie Awards ⁶ .	Audible, Apple, Spotify, OverDrive, etc.	In-house audio production with dedicated studios. Hachette has built out recording studios and added producers to meet demand ⁷ . Its audio team has scaled up output dramatically (from ~50 titles/year in the early 2000s to ~700+ by 2017) ⁷ , converting both new releases and backlist bestsellers into audio.
Simon & Schuster (S&S)	USA (Global)	Operates S&S Audio . In 2025 S&S launched <i>Simon Maverick</i> , a new audio-first imprint to publish 50–100 audiobooks per year ⁸ , focusing on titles (especially from indie authors) not yet in audio. S&S Audio already produces ~500 audiobooks annually in-house ⁹ . Executives note audio is a growth area and cite opportunities on Spotify, OverDrive, Apple, and Audible ¹⁰ .	Audible, Apple Books, Spotify, OverDrive, etc.	In-house audio division (Simon & Schuster Audio) with new initiatives to expand content. The Simon Maverick imprint shows S&S actively converting both <i>existing ebooks</i> and original projects into audiobooks ¹¹ . S&S leverages its internal studios and also pursues audio-original projects, signaling a “ <i>substantial audio division</i> ” that is growing aggressively ¹² .

Publisher	Country/ Region	Audiobook Activity (Evidence)	Platforms	Production Approach / Notes
Macmillan Publishers	USA (Global)	Houses Macmillan Audio (founded 1987) which produces audio editions of its imprints (Tor, St. Martin's Press, etc.). Macmillan has significantly ramped up audio output in recent years – like other big publishers, it expanded staff and facilities to handle a “robust” <i>increase in audiobook production</i> ¹³ . It built an in-house studio in New York that has been “fully operational...and a huge success,” recording a high volume of titles ¹⁴ .	Audible, Apple, Google Play, libraries, etc.	In-house audio production (Macmillan Audio) with its own studio and team. Macmillan’s audio publisher noted they aim to keep the studio busy with authors and voice talent ¹⁴ , and like peers, have increased title output by using both internal staff and outside studio partners to scale up production ¹⁵ .
Bloomsbury Publishing	UK (Global)	A leading indie publisher now heavily invested in audio. Bloomsbury has an audiobook catalog (including titles by Sarah J. Maas, etc.) and in late 2024 it signed a distribution deal to make its <i>entire audio catalogue</i> available on Spotify’s platform across the US, UK, Canada, Australia/NZ ¹⁶ . Additionally, Bloomsbury partnered with Spotify’s in-house program to create 51 audiobooks from its popular 33½ book series ¹⁷ , signaling an interest in innovative audio distribution.	Audible, Spotify (via deal), other retail and library platforms.	Primarily uses external partners for production/distribution. Bloomsbury’s Spotify agreement suggests it is leveraging new platforms to reach listeners ¹⁶ . Many Bloomsbury titles have been produced as audiobooks (often via studios or co-publishing deals). The 33½ <i>series</i> audiobooks were produced in partnership with Spotify’s audiobook team ¹⁷ . Bloomsbury does not have a dedicated audio imprint in-house, but clearly <i>prioritizes converting its print titles to audio</i> via strategic partnerships.

Independent and Regional Publishers Embracing Audiobook Conversion

Publisher	Country/ Region	Audiobook Activity (Evidence)	Platforms	Production Approach / Notes
Sourcebooks	USA	Mid-sized publisher (Naperville, IL) that launched a major audiobook program in partnership with Penguin Random House Audio in late 2024 ¹⁸ . Sourcebooks hired a dedicated audio publisher and production director and will begin producing audiobooks from its bestselling imprints (mystery, romance, nonfiction) starting Jan 2025 ¹⁹ ²⁰ . Plans to expand audio to all its imprints by 2026.	Audible, Apple, etc. (distributed via PRH Audio's channels).	New in-house audio initiative under PRH Audio's umbrella. Sourcebooks' audiobooks will be produced internally (with PRH Audio providing distribution and some production support) ¹⁹ . This partnership lets Sourcebooks retain creative control while leveraging PRH's studio infrastructure. It signals a commitment to convert extensive backlist and frontlist titles into audiobooks.

Publisher	Country/ Region	Audiobook Activity (Evidence)	Platforms	Production Approach / Notes
Podium (Podium Entertainment)	USA	An audio-first publisher originally – Podium made its name turning self-published e-books (e.g. <i>The Martian</i>) into audiobooks. By 2025 it has a catalog of 10,000+ audio titles and has expanded into print/ebook as well ²¹ . Podium announced new distribution deals in 2025 to get its audiobooks onto <i>Audible, Spotify, Apple Books, Storytel, Audiobooks.com</i> , and library platforms like OverDrive and Hoopla ²² . It remains one of the world’s largest audiobook publishers.	Audible, Audible Plus, Spotify, Apple Books, Storytel, Audiobooks.com, OverDrive, Hoopla, etc. ²² .	Primarily in-house production (focus on genre fiction). Podium handles casting, recording, and post-production, often working with freelance narrators. It champions indie authors – most projects are acquired from self-publishers ²³ . Podium’s model is to rapidly produce high-quality audio and distribute widely; they have the infrastructure to scale up audio quickly (which can be a selling point to authors) ⁹ ²² .

Publisher	Country/ Region	Audiobook Activity (Evidence)	Platforms	Production Approach / Notes
Saga Egmont (Lindhardt & Ringhof)	Denmark (Global)	The digital publishing arm of Egmont Group, Saga Egmont is aggressively converting books (from both Egmont's catalog and other publishers) into audiobooks and e-books. Saga has formed partnerships with numerous independent presses to produce audio: e.g. in 2022 it struck deals with UK/Irish publishers to create English audiobooks for 300+ titles that had no audio editions²⁴ ²⁵. Saga obtains exclusive audio rights and distributes these audiobooks internationally via Audible, Storytel, and other platforms²⁶. It publishes 25,000+ titles/year in ~30 languages.	Audible, Storytel, Spotify, Audiobooks.com, Google, libraries, etc. ²⁶ . (Saga distributes to ~450 retailers/platforms worldwide.)	Full-service audiobook producer/distributor. Saga Egmont handles production end-to-end: it licenses rights from publishers, records the audiobooks (using a network of studios and narrators), and then distributes globally. This is often done under Saga's imprint. Saga's mission is to "<i>bring all stories to life</i>" in audio²⁷, which for partner publishers (often small/medium houses) effectively outsources their audiobook conversion. Egmont's vast scale and data-driven approach allow cost-effective production of both frontlist and deep backlist titles in audio.

Publisher	Country/ Region	Audiobook Activity (Evidence)	Platforms	Production Approach / Notes
Storm Publishing	UK	A new independent publisher (digital-first) that launched an audiobook program from day one. In 2023, Storm partnered with Dreamscape Media to produce and distribute its titles in audio worldwide ²⁸ . Storm announced it would record and publish 70+ <i>audiobooks in 2023, expanding to 120+ in 2024</i> ²⁹ – essentially committing to audio for every title. Initial audio releases span genres (thrillers, historical fiction, etc., matching Storm’s e-book/print list).	Audible, Amazon, iTunes, libraries (Dreamscape distributes to retail and library channels like Hoopla, OverDrive), and possibly YouTube (for promotional samples).	Outsourced production via partnership. Storm outsources audiobook creation to Dreamscape Media’s production arm (Dreamscape handles narration, recording, and global distribution) ²⁸ . This allows Storm (with a lean staff) to achieve audio at scale quickly. Storm’s leadership emphasizes the importance of audio in reaching more readers and has built audio royalties into its author contracts (Storm offers 50% royalties on audiobooks to authors) ³⁰ .

Publisher	Country/ Region	Audiobook Activity (Evidence)	Platforms	Production Approach / Notes
Head of Zeus (HoZ)	UK	A medium-sized UK publisher (now an imprint of Bloomsbury) that has publically affirmed its commitment to audiobooks. HoZ entered a deal with Saga Egmont to audio-publish a large portion of its catalog – the CEO said HoZ “strives toward total audio coverage of our list, both frontlist and backlist.” ³¹ This partnership gave Saga Egmont audio rights to many HoZ titles, ensuring even older HoZ books get audiobook editions.	Audible, Storytel, etc. (via Saga distribution), plus standard retail platforms.	Mixed approach: HoZ has some audiobooks produced in-house or via Bloomsbury’s arrangements, but notably chose Saga Egmont to handle a bulk conversion of titles to audio ³² . Saga produces these audiobooks externally. HoZ’s stance of “total audio coverage” implies that <i>every new HoZ title is released in audio</i> and many backlist titles are being retrofitted with audiobooks, leveraging external partners to accomplish this.

Publisher	Country/ Region	Audiobook Activity (Evidence)	Platforms	Production Approach / Notes
Bookouture	UK	A digital-first fiction imprint (owned by Hachette UK) that has embraced audio for its titles. In 2022, Bookouture signed with Saga Egmont to produce audiobooks for numerous Bookouture novels, expanding their reach globally ³² . Bookouture's Audio Manager praised Saga's <i>"commitment to bringing as many stories as possible to life in audio, catering to a global audience on a variety of platforms."</i> ²⁷ Many of Bookouture's bestselling e-books (crime, romance, etc.) are now concurrently released as audiobooks.	Audible, Spotify, etc. (via Saga and Hachette distribution).	Partnership model: As a primarily e-book publisher, Bookouture does not have an internal audio department; instead it leverages Saga Egmont's production expertise ²⁷ . Saga produces and distributes Bookouture audiobooks under Saga's imprint, while Bookouture focuses on acquiring and editing content. (Since Bookouture is part of Hachette, some titles may also go through Hachette Audio for certain markets.) The key is that Bookouture ensured its authors' works are in audio format without building a full studio – illustrating how digital publishers can <i>partner to convert their catalogs</i>.

Publisher	Country/ Region	Audiobook Activity (Evidence)	Platforms	Production Approach / Notes
Jacaranda Books	UK	A small independent London-based publisher (focused on diverse voices) that in 2022 partnered with Saga Egmont to produce audiobooks of its titles ³² . This deal gave Saga audio rights to a selection of Jacaranda's catalog which had no audio editions yet. Dozens of Jacaranda books (literary fiction, YA, nonfiction) have since been released as audiobooks, significantly boosting the accessibility of their catalog.	Audible, etc. (via Saga).	External production: Jacaranda utilizes Saga Egmont as an off-site audio producer/distributor. Being a small press, Jacaranda likely couldn't invest in audiobook production alone; the Saga partnership allowed "zero-cost" audio conversion (Saga bears production costs, paying royalties to Jacaranda). Jacaranda's move is representative of many indie publishers: teaming up with larger audio specialists to ensure their books exist in audio format.

Publisher	Country/ Region	Audiobook Activity (Evidence)	Platforms	Production Approach / Notes
New Island Books	Ireland	An independent Irish publisher that similarly signed on with Saga Egmont to create audiobooks of its titles ³² . As part of the 2022 Saga partnerships, New Island granted Saga rights to produce English-language audiobooks from both its frontlist and backlist (including literary fiction and memoirs that previously had no audio). Over 300 combined titles from New Island and others were covered in these deals ²⁵ .	Audible, etc. (via Saga).	External production: New Island's audiobooks are produced and distributed by Saga Egmont. This enables an Irish-focused publisher to reach global listeners without building its own audio team. New Island can now market audio editions of its books (narrated by professional voice actors) on major platforms, increasing the audience for Irish authors. This case underlines how regional indie publishers are getting into audio through partnerships.

Publisher	Country/ Region	Audiobook Activity (Evidence)	Platforms	Production Approach / Notes
Roca Editorial	Spain	A prominent Spanish-language publisher (Barcelona-based) that launched a comprehensive audiobook initiative via partnership. In 2021 Roca announced it partnered with Saga Egmont <i>“to produce, publish and distribute [Roca’s] catalogue of bestselling novels and non-fiction titles”</i> as audiobooks ³³ . Roca’s CEO stated they sought this alliance so that <i>“soon we can offer all of our authors...their books as high-quality audiobooks.”</i> ³⁴ Roca’s titles (across genres: fiction, YA, thriller, etc.) are now steadily being released in audio.	Audible, Storytel, etc. (Spanish markets and global platforms via Saga).	Partnership model: Roca outsources audiobook production to Saga Egmont, which has expertise in Spanish audiobook production. Saga and Roca operate under a cooperative label for these audiobooks ³⁵ . Roca provides the books/rights, and Saga handles casting (Spanish voice actors) and production. This has dramatically increased Roca’s audio output, allowing even mid-list or backlist titles to get audio versions. It exemplifies a <i>traditional publisher (Roca) pivoting to audio by teaming with an international digital specialist.</i>

Publisher	Country/ Region	Audiobook Activity (Evidence)	Platforms	Production Approach / Notes
Cappelen Damm	Norway	Norway's largest publisher, active in audiobooks both domestically and through export. Cappelen Damm has its own audio imprint for the Norwegian market, and in 2024 it expanded internationally by partnering with Saga Egmont. A joint initiative was announced to take popular Norwegian titles (e.g. Karin Fossum's crime novels) and publish them in new markets & formats, including audiobooks in other languages ³⁶ ³⁷ . Saga and Cappelen Damm began by <i>recording existing back-catalogue titles</i> for release as audiobooks abroad (German, Danish, Swedish editions, etc.).	Audible (and local platforms like Storytel Nordic, etc.), international distribution via Saga.	Hybrid approach: In Norway, Cappelen Damm produces its own audiobooks (Norwegian narrations) for domestic release. For international reach, it collaborates with Saga Egmont to produce <i>translated audiobooks</i> of its authors ³⁶ . This strategy shows a publisher converting its IP into audio for both local consumption and global distribution. By using Saga's resources, Cappelen Damm can extend its catalog's audio presence without setting up studios in each target country.

Publisher	Country/ Region	Audiobook Activity (Evidence)	Platforms	Production Approach / Notes
LeYa	Portugal	One of Portugal's largest publishing groups, LeYa has moved into audiobooks as the format grows locally. LeYa partnered with Kobo in 2023 to launch a Portuguese-language audiobook subscription service ³⁸ (through Kobo's platform), indicating LeYa had produced or licensed a critical mass of audiobooks. LeYa is making popular titles (including Lusophone authors) available in audio, a relatively new market in Portugal.	Kobo Plus (subscription in Portugal) ³⁸ ; likely Audible and Google for à la carte sales.	Mixed approach: LeYa's partnership with Kobo suggests it is primarily a distribution alliance – LeYa provides the audiobook content and Kobo distributes via a subscription model. The production of the audiobooks is likely handled via third-party studios or in cooperation with Kobo/Fnac. By joining with Kobo, LeYa ensured its audiobooks reach Portuguese listeners in an affordable way. This reflects a strategy where <i>a regional publisher converts key titles to audio</i> and uses an international platform to deliver them.

Publisher	Country/ Region	Audiobook Activity (Evidence)	Platforms	Production Approach / Notes
Amar Chitra Katha (ACK)	India	A famous Indian publisher of comics and mythological stories, ACK has recently begun converting its library into audiobooks. In 2023, Audible partnered with Amar Chitra Katha to produce and release <i>111 of ACK's iconic stories as audiobooks in English</i> ³⁹ , with plans for editions in 6 Indian languages to follow. These audiobooks (e.g. the Ramayana series) use dramatized narration and soundscapes to bring the comic stories to life ⁴⁰ . The English collection launched exclusively on Audible India in late 2023 ⁴¹ .	Audible (Audible.in exclusive for English launch) ⁴¹ ; other languages likely on Audible and possibly other local platforms in future.	External production via Audible: Audible's team handled the casting, voice performances, and audio production for the ACK stories ⁴² . ACK provided the content and editorial input. This collaboration allowed a print comic publisher to leap into audiobooks without in-house audio staff. The result is a high-quality audio library that extends ACK's reach (especially to young audiences and families) through streaming. ACK's case illustrates how even <i>illustrated content</i> can be reimaged in audio format through strategic partnerships (in this case, with Audible's content studio).

Strategies for Ongoing Research

To continue discovering publishers who are converting books to audiobooks, you can use several **repeatable research methods**:

- **Monitor Audiobook Platforms:** Regularly search audiobook marketplaces like **Audible, Spotify, Apple Books, Google Play Books, and Storytel** for publisher names. For example, on Audible you can look up a publisher's name (many audiobook listings show the print publisher as "Publisher"). If a publisher has an Audible **profile page** or numerous titles there, it's evidence of active audiobook releases. Similarly, browse Spotify's audiobook section or Apple's audiobook category for familiar publisher imprints. This can reveal new publishers entering the audio space (for instance, noticing a surge of audiobooks from a mid-size publisher's catalog).

- **Trade News & Press Releases:** Keep up with industry news via **Publishers Weekly, The Bookseller, Publishing Perspectives**, and press release wires. Use targeted search queries like “[Publisher Name] launches audiobook imprint” or “[Year] audiobook partnership”. Phrases such as “**launches audio division**”, “**audio imprint**”, “**partners with [audiobook producer]**”, “**expands into audiobooks**” are effective. For example, news of *Simon & Schuster’s* new audio imprint ⁴³ or *HarperCollins’ AI audiobook partnership* ⁴⁴ came via press releases and articles. Setting Google Alerts for terms like “*publisher audiobook launch*” or “*audiobook rights deal*” can automate this.
- **Publishers’ Websites and Social Media:** Visit publishers’ official websites for clues of audio activity – many now have an “**Audiobooks**” section or announcements about audio releases. Check press/news pages for any mention of “audiobook” or “audio.” Also scan their **Twitter, LinkedIn, or Facebook** for posts about new audiobook releases or narrator recruitment. Publishers often boast when a bestseller is now on Audible or when they’ve won audio awards, etc. These hints can lead you to deeper info. (E.g., a publisher tweeting “*Thrilled to announce our partnership with [Audio Company]*” is a clear lead.)
- **Search by Imprints or Subsidiaries:** Large publishing groups often have dedicated **audio imprints** (e.g. HarperAudio, Macmillan Audio). Researching these imprints will show you which parent publishers are active. Also look for new **audio-focused imprints** – for instance, Simon & Schuster’s **Simon Maverick** imprint ⁸ was reported in news; searching imprint names can yield press details.
- **Industry Events and Reports:** Look at presentations or panels from events like the **Frankfurt Book Fair, London Book Fair, or Audio Publishers Association (APA) conferences**. Often publishers share their audio expansion plans there. For example, the Frankfurt audio summit might highlight a publisher from Brazil or India starting audiobook lines ⁴⁵ ⁴⁶. Similarly, the APA’s annual report lists which publishers produced significant numbers of audiobooks each year – a spike for a given publisher could indicate a new initiative.
- **Local and Niche Markets:** Don’t ignore non-English markets. Use search terms in other languages (or trade publications in those regions) for phrases like “audiolibro” (Spanish), “livre audio” (French), “Hörbuch Verlag” (German audiobook publisher), etc. This can uncover, say, a **Spanish-language publisher** partnering with Storytel, or a **Scandinavian publisher** launching an audio-first imprint. Publishing news sites in various countries often report when a traditional publisher makes a big audio move.
- **Leverage audiobook service providers:** Many publishers partner with production/distribution companies (e.g. **Findaway Voices, RBmedia, Bookwire, OverDrive**). Follow news from these companies’ websites. For instance, OverDrive announced an exclusive audio production deal with HarperCollins for libraries in 2022, which revealed HarperCollins’ expansion in that area. Bookwire’s press releases might mention new publisher clients using their audiobook service. These B2B announcements effectively highlight publishers seeking to convert catalogs to audio.
- **Search for Job Listings:** An indirect but telling clue is when a publisher posts job openings related to audiobooks (e.g. “Audio Rights Manager”, “Senior Audio Producer”, “Head of Audio Content”). Checking publishers’ careers pages or LinkedIn job postings can signal that a publisher is investing in an audio program, even before any public press release.

Using the strategies above on a continuous basis will help you spot new entrants and initiatives in the audiobook arena. For consistency, you might create a **research checklist** – e.g., each quarter: 1) scan

the main audiobook platforms for new publisher names, 2) search news with relevant keywords plus the current year, 3) review a few key industry sites for audio-specific columns (like *Publishers Weekly's* "Audio Books" section), and 4) check in on social media/book trade gossip. Over time, this will build a growing list of publishers worldwide that are converting their print/ebook catalogs into audiobooks – prime contacts to approach with your service. Keep in mind that the landscape is fast-evolving, so staying updated is crucial; as one publisher put it, *"the opportunities for audio are greater than before"* ¹⁰, and nearly every forward-thinking publisher is evaluating how to get their books into audio formats. By combining diligent research with the strategies above, you'll continuously uncover those opportunities.
